ABOUT MATURITY & DRINKABILITY

The old adage that “all wine improves with age” has evolved over the years – it used to be that a bottle of red could be cellared for decades, but that has changed.

Opimian has made it their goal to provide wines you can savour, enjoy and cellar. Our guideline – the Maturity and Drinkability (M&D) scale – clearly indicates when your wine is at its optimal drinking age.

Jane Masters, our Master of Wine, is familiar with Opimian’s wines and our members’ palates; this is what makes her the ideal person for the highly laborious task of tasting each wine and updating the M&Ds for those Opimian wines that are still drinkable. Please note that a few of our older wines were tasted by our previous Master of Wine, Kenneth Christie. These wines are marked “KBC” before the tasting year.

Wines that have reached M10 D10 are highlighted in yellow. Open them by the end of 2019.

Maturity (M)

Maturity indicates the aging potential of a wine. Lower M ratings are assigned to wines that are young, closed and expected to age and evolve significantly over the coming years; higher M ratings indicate wines that are open, mature and close to the peak of their evolution. For example, an M rating of:

- 1 – 5** Young, it will develop further over several more years. *Only open a bottle that has an M of 5 if the D associated with it is higher than 7.*
- 6 – 8** Maturing and open, though this will develop for another one to five years, it is nearing its peak. *Open a bottle when the D rating is higher than 7 and/or if you enjoy your wines young.*
- 9 – 10** Fully mature and at its prime, this will not develop any further – especially if it is a 10. *These are the wines that should be opened and enjoyed.*

Drinkability (D)

Drinkability indicates how the flavours present themselves during the tasting experience. Do the different characteristics of the wine blend well on the palate? Does each flavour harmonize with the other, creating a pleasurable experience? Lower D ratings are assigned to wines that are young, closed and not yet ready to drink. Higher D ratings indicate wines that present well on the nose, palate and finish. For example, a D rating of:

- 1 – 5** Closed and tannic; this is not enjoyable right now but will develop and open as it matures. *Lower D ratings are usually only found with lower M ratings, indicating good aging ability.*
- 6 – 7** Starting to mature and express pleasant characteristics, you can open a bottle now, though there is still room for the wine’s flavours to soften. *If you like your wines tannic, open it when the D is at this rating.*
- 8 – 10** Perfect. The different components of the wine have come together to give it a great personality and loveable character. *Open and enjoy.*

Interpreting M&D Ratings

Now that you have an understanding of the ratings by themselves, it’s time to combine the numbers to truly appreciate the system we have in place. *Always keep in mind that a wine can be young but still drinkable and vice versa!*

Here are a few examples of rating combinations you may find within this document:

- M6 D7** This wine has started to evolve. It is drinking a little less than optimally and we would suggest that you keep it in your cellar for a few years. However, if you enjoy your wines tannic, try a bottle.
- M7 D9** This wine is developing; the flavours and characteristics are blending perfectly to create an experience that will impress you. Though this wine will mature and change, it is enjoyable right now.
- M8 D8** This wine is ready now; it has matured at an acceptable rate and is pleasurable to drink. It can be left to mature further, as it has some room to age, or it can be enjoyed now. It depends on if you prefer your wines to be a tad young or if you would rather they were softer and closer to full maturity.
- M10 D10** This wine is at its prime but will not improve any further. After this year, the wine might start to decline in quality. Great, high quality wines may stay drinkable for another two years after they have reached 10/10, but they will not change or evolve any further.

What does it mean for the wines that haven’t been tasted yet?

Wines with no tasting date have not yet been tasted. We’ve updated the M&Ds and drinking window appropriately so you still have an accurate M&D rating and cellaring window.
